Description

Designed for educational applications, the ICA-TR68MW motorized, height-adjustable wall mount provides added security for classrooms, school lobbies and other educational scenarios. By eliminating the base of the mobile TV cart, the static wall mounting option frees up more space and avoids trip hazards to protect children as they play around the stand. The wide height range from 925 -1600 mm, controlled by an RF remote control with 2 memories, adapts to rooms of various sizes for comfortable viewing and presentations.
The powerful dual motor design offers ample capacity to lift and lower even the heaviest 55"-100" TVs (up to 120kg).
This large wall mounted TV stand is the perfect solution for delivering engaging and effective teaching without any worries about safety.

Features

- Dual motor drive provides the ability to lift heavy TVs and maintain greater stability
- Electric wall TV lift, effortlessly adjustable in height
- Sturdy steel construction safely supports the heaviest TVs
- The included remote control allows you to adjust the TV quickly and easily
- Ideal for nursery schools, primary schools and recreational play centers for children
