[1] ROLINE Category 6 / 6A Component Level patch cords have a

- protection of the plug latch, - durable cable strain relief, are flexible, - LSOH (flame retardant, low smoke and halogen free) - and last but not least they are compatible with both T568A and T568B cabling systems. ROLINE Cat.6 / 6A Component Level cords are 100% transmission tested to Component Level performance as specified in TIA/EIA-568-B.2-1. • They are assembled in a controlled environment using advanced manufacturing techniques to insure consistent quality. • These patch cords have been tested on Component Level. This means, you can add them to ANY Permanent Link that fulfil Cat.6 / Cat.6A and the resulting Channel will also fulfil Cat.6 / Cat.6A. Even more, combining any components (patch cords, jacks, patch-

panels, wall boxes) that are tested on Component Level, will result in a Channel that fulfills the norm.

• Impedance: 100 Ohm • Contact settings 1:1, in accordance with the EIA/TIA 568 standard

[1a] ROLINE UTP PatchCord, Cat.6 / 6A LSOH, Component Level

• Patch cable for networking connections between devices. • Prepared unshielded Twisted Pair cable with RJ-45 connectors on both ends. • Durable due to moulded kink protection • Flexible cable, suitable for narrow bending

[2] ROLINE S/FTP-(PiMF-) PatchCord Cat.6 / Cat.6A, Component Level

• ROLINE Cat.6a cabling for fast data transfer rates of up to 10 GBit/s and a bandwidth of 500 MHz • Patch cable for networking connections between devices. • Prepared double shielded Twisted Pair cable (PiMF) with screened RJ-45 connectors on both ends. • Durable due to moulded kink protection. • Flexible cable, suitable for narrow bending • High quality plugs • Construction: 4-pair stranded copper wire, pairs shielded with aluminium clad polyester foil, complete braid shielding

[2] VALUE HD-TVI's Cameras Full HD 1080P via coaxial cable

The new HD-TVI standard supports analog transmission of HD video recording at a resolution of 1080P over distances of up to 500m over coaxial cable or 200m over twisted pair. HD-TVI uses a low-frequency signal that is largely insensitive to electromagnetic interference, so that the transmission is particularly reliable. And since the data is not compressed, a real-time display in megapixel resolution is possible without latency. The HD-TVI technology is ideal for upgrading analog systems to HD, because existing facilities are simply taken and therefore investment can be protected into existing infrastructures.

Plug & Play via coax cable

The setting of the OSD has never been so easy! Thanks UTC technology all video and data signals can be transmitted via the coaxial cable, so no additional cables (RS485) are required - and Plug & Play can be connected automatically everything. The result is exceptional flexibility and ease of installation compared to conventional analogue systems: users can now upgrade existing facilities without large investments quickly and easily for the transmission of images in HD quality.

High compatibility thanks Tribrid technology

The Tribrid technology of the new HD-TVI series offers seamless compatibility - a real revolution in the field of professional security monitoring. The HD-TVI DVRs can process video signals from analog, HD TVI-, CIF, VD and IP megapixel cameras, enabling easy integration of various technologies. Thanks autosensing everything is automatic and installation is a breeze. Now users can take advantage of 1080p resolution to enjoy without replacing existing equipment and infrastructure. This makes HD-TVI DVRs choice for retrofitting existing systems.

- protection of the plug latch, - durable cable strain relief, are flexible, - LSOH (flame retardant, low smoke and halogen free) - and last but not least they are compatible with both T568A and T568B cabling systems. ROLINE Cat.6 / 6A Component Level cords are 100% transmission tested to Component Level performance as specified in TIA/EIA-568-B.2-1. • They are assembled in a controlled environment using advanced manufacturing techniques to insure consistent quality. • These patch cords have been tested on Component Level. This means, you can add them to ANY Permanent Link that fulfils Cat.6 / Cat.6A and the resulting Channel will also fulfil Cat.6 / Cat.6A. Even more, combining any components (patch cords, jacks, patch-panels, wall boxes) that are tested on Component Level, will result in a Channel that fulfils the norm.

• Impedance: 100 Ohm • Contact settings 1:1, in accordance with the EIA/TIA 568 standard

[4] ROLINE UTP PatchCord, Cat.6A, LSOH, Component Level

• Patch cable for networking connections between devices. • Prepared unshielded Twisted Pair cable with RJ-45 connectors on both ends. • Durable due to moulded kink protection • Flexible cable, suitable for narrow bending

[5] ROLINE S/FTP-(PiMF-) PatchCord Cat.6a, Component Level

- ROLINE Cat.6a cabling for fast data transfer rates of up to 10 Gbit/s and a bandwidth of 500 MHz • Patch cable for networking connections between devices. • Prepared double shielded Twisted Pair cable (PiMF) with screened RJ-45 connectors on both ends. • Durable due to moulded kink protection. • Flexible cable, suitable for narrow bending
- Impedance: 100 Ohm • High quality plugs • • Construction: 4-pair stranded copper wire, pairs shielded with aluminium clad polyester foil, complete braid shielding

[6] VALUE / ROLINE Modular Couplers Cat.5e/Cat.6

- The couplers are available in 2 versions: shielded with metal housing & unshielded with plastic housing • The couplers are able to extend Cat.5e / Cat.6 cables • Best transmission characteristics for pair combination 1/2 and 3/6 (as used by all ethernet versions)

[8] ROLINE Fibre Optic Jumper Cables, OM3 / OM4

roline
Designed for Professionals

[8] ROLINE Fibre Optic Jumper Cables, OM3 / OM4

- ROLINE Fibre Optic Jumper Cables with OM3/OM4 quality for high performance wiring • OM4 fibre is a 50µm laser-optimized fibre with extended bandwidth. It will be used to enhance the system performance for existing 1 and 10 Gbit/s applications as well as future 40 and 100 Gbit/s systems.
- The quality of the connectors and fibres and an optimal assembly procedure lead to extremely good characteristics in respect of insertion loss and reflection • Duplex Cable with fibre type multi-mode 50/125µm • On one side Fibre Optic connector LC, on the other side LC, SC or ST
- Colour: Turquoise (OM3) or Purple (OM4)

Technical data:

Conductor construction: Compact conductor (fibre movable in secondary coating)
Cable construction: Kevlar tension reduction
PVC outer coating, Ø 2.8 mm

[9] ROLINE FO Jumper Cable 50/125µm OM4, LC/LC, Low-Loss-Connector for DataCenter

roline
Designed for Professionals

[9] ROLINE FO Jumper Cable 50/125µm OM4, LC/LC, Low-Loss-Connector for DataCenter

- To double the density of fibers per rack and improve handling in Central Offices and Data Centres • The new connector significantly reduces the amount of space needed, helping to control costs and improve efficiency • For a more efficient handling the connector of the fibre optic cable is equipped with a rigid, extended lever that employs a new way of push/pull mechanism • The OM4 fiber and connector quality ensures an excellent quality at very high bandwidths
- Material and assembly in ROLINE quality • The cable assembled with "low-loss" connectors achieve very good values for insertion loss and reflection. In comparison:
 - Typical attenuation of a standard LC connector: 0.5 dB
 - Typical attenuation of a low-loss LC connector: 0.15 dB
- Duplex cables with fiber type Multi-mode 50/125µm, OM4
- Colour: purple
